Summary

Computer Science undergraduate with strong skills in full-stack development and data structures and algorithms. Experienced in developing MERN stack projects and integrating AI APIs to create smart, user-friendly systems. Passionate about combining web development with AI tools to build modern, automated, and high-performing digital experiences. Solved 850+ DSA problems and familiar with DBMS, OS, and Computer Networks. Seeking internship opportunities to apply and grow.

Technical Skills

Programming Languages: Javascript, Java, Python, C++

Core Computer Science: Data Structures and Algorithms, Design and Analysis of Algorithms, Computer Networks, Database Management Systems (DBMS), Object-Oriented Programming (OOP), Operating Systems, Web Technologies

Frontend: React.js, HTML5, CSS3, Tailwind CSS, Responsive Design

Backend: Node.js, Express.js

Databases: MongoDB, MySQL, PostgreSQL

Concepts: REST APIs, UI/UX Optimization, Cross-Browser Compatibility

AI & Tools: Google Gemini API, AI-based content generation

Tools: Git, GitHub, Postman, VS Code, Vercel, Render, Linux

Education

Bachelor of Technology (B.Tech) in Computer Science and Engineering

Heritage Institute of Technology, Kolkata

[2023 – 2027]

CGPA: 8.56

Projects

AI Recipe Generator (MERN + AI Integration) — (github)

- Developed a full-stack AI Recipe Generator using MERN stack with JWT-based authentication and secure user management.
- Integrated Google Gemini API (gemini-2.0-flash) to generate personalized recipes from pantry items with dietary and cuisine filters.
- Built pantry management system with expiry tracking, low-stock alerts, and category-based organization.
- Implemented meal planner and shopping list for weekly scheduling and seamless ingredient tracking.
- Designed normalized PostgreSQL database (Neon) for efficient data handling and scalability.
- Created a responsive UI using Tailwind CSS with dashboard, filters, and real-time user interactions.

TechKnowUp – Technical Knowledge Sharing Platform — (github)

- Built a full-stack MERN application enabling users to create, explore, update, and manage technical articles on programming and technology stacks.
- Developed REST APIs with Node.js and Express.js and integrated MongoDB for scalable data storage.
- Implemented Redux Toolkit for centralized state management in the React frontend.
- Designed a responsive user interface using React.js and Material UI, improving usability and enhancing the user experience for content creation and discovery.

Problem Solving Experience

- Solved 850+ Data Structures and Algorithms problems on LeetCode and GeeksforGeeks, with a strong focus on optimization and clean coding practices
- Regular participation in coding contests on LeetCode and CodeChef

Certifications

- **GFG-160 Days Problem Solving Course** – GeeksForGeeks Certificate
- **Full Stack Web Development - Skill Up** – GeeksForGeeks Certificate
